BiOTECK[®]

The science of bone tissue

The perfect **balance** between
Nature and Biotechnology

**pericardium
membrane**

HEART 

Heart pericardium membrane

Heart is an equine derived pericardium membrane treated with the exclusive Bioteck process. The immunogenic components are removed by this procedure, while the collagen fibers present into the membrane are preserved in their tridimensional and multidirectional structure.

Heart is used for regenerative medicine in dental surgery, orthopedics, and neurosurgery.

Protection time: 3 - 4 months

Dental surgery codes

HRT-001

Pericardium Membrane
membrane 1 pc 30x25x0.2 mm

HRT-002

Pericardium Membrane
membrane 1 pc 50x30x0.2 mm

HRT-003

Pericardium Membrane
membrane 2 pc 15x20x0.2 mm

Features

- > **slow** reabsorption time
- > **resistant** and **elastic**
- > long **protection time**
- > **practical** and **easy-to-handle**
- > simple **to suture**
