

AQUALIZER®

BITE AND BODY IN BALANCE

TMJ PAIN RELIEF AND TREATMENT WITH
AQUALIZER® DENTAL SPLINTS

**INSTANT
HYDROSTATIC SPLINT**

AQUALIZER.COM

The Aqualizer's fluid system creates perfect bite balance and stability through a minimally invasive approach to TMD treatment. It works by allowing the muscles themselves to automatically reposition the jaw to where it naturally works best. For TMD pain relief, restoring this balance is essential. Unlike other available dental splints, the Aqualizer self-adjusting oral splint is a TMD treatment which allows the body to unravel bite distortions and establish optimal systemic function and balance. The Aqualizer takes the uncertainty out of TMD diagnosis and treatment. While other dental splints and TMD treatment options can distort the jaw, causing TMD pain, the Aqualizer facilitates relief through ideal occlusion automatically and naturally. The Aqualizer is also a perfect supplement in other medical disciplines besides dentistry. Today this device is integrated into physical therapy, osteopathy, orthodontic treatment, orthopedics and many other medical disciplines.
